

RE: SB 100- Support

Dear California State Legislature:

The young people of California write in support of this important legislation. We thank the Pro Tem for his leadership on raising the Renewable Portfolio Standard and advancing our path toward a 100 percent clean energy future.

Burning fossil fuels is not only polluting our air, water and land, it's changing our climate even faster than scientists predicted.

According to the American Lung Association's State of the Air 2017 report, California has the distinction of being home to the majority of the Top 10 cities with ozone and particle pollution in the United States. More than 90 percent of Californians live in areas with unhealthy air at some point during the year, a serious public health concern at a time when the federal government is considering rolling back clean air protections.

The good news is that we can have healthier communities now and a livable future for kids growing up today if we take action now to move rapidly to a 100 percent renewable energy future.

As young people, we want the world we inherit to be the best that it possibly can be. We have a vested interest, as this will affect us the rest of our lives. This will be the planet we raise our children on, and grow old on ourselves. Our future, as a state and a nation, is in jeopardy. We know that this legislation is a step toward fixing this.

We support SB 100 because it will set a clean energy standard of 50% by 2026, 60% by 2030 and 100% by 2045. This leadership is important to protect the environment and our planet.

Sincerely,

Name	School	Organization	Title
Rafi Sands	UCLA	UC Regents	Student Advisor to the UC Regents
Haley Nieh	UC Santa Barbara	Climate Reality Campus Corps	President, UCSB Chapter

Lauren Holt	UC San Diego	The Guardian	News Editor
